Varun Chauhan

LEAD SOFTWARE ENGINEER

<https://www.linkedin.com/in/scvarun/>

A Passionate Developer with 8+ years of total work experience as a Full Stack Dev. My skills include frontend, backend and hybrid mobile app development with Reactjs/NextJs, Nodejs/ExpressJs, GraphQL, Docker, AWS, MySQL, MongoDB, Wordpress, Laravel, React Native and Flutter. Looking for Full Stack Dev work opportunity.

Experience

June 2025 - Present

FIRMINIQ Systems India

Technology Lead

Worked as a Lead Backend Engineer on their product:

- Managed team on task of backend development
- Backend Development (NodeJs/AWS Lambda)
- NoSQL Databases (DynamoDB), API Gateway, SNS, SQS, WebSockets
- Worked with Github Actions, and AWS CodePipeline

March 2023 - June 2025

CloudEQ Software Inc, cloudeq.com

Lead Software Engineer

Worked as a Lead Software Engineer on various Website Applications and Mobile App solutions:

- Managed team on task of frontend development on multiple projects and while also working on backend development on various technologies
- Web Applications (ReactJs/NextJs), API and Backend Development (NodeJs/NestJs/Django/.NET)
- NoSQL Databases (DynamoDB), Firebase, MySQL, Redis and ElasticSearch
- Looked into CI/CD using Github Actions, and deployed to Kubernetes Cluster and Docker Compose

September 2022 - March 2023

LectureNotes Pvt Ltd, lecturenotes.in

Full Stack Developer

Worked as a Full Stack Developer creating Website Applications and Mobile App solutions:

- Hybrid Mobile Applications (React Native), Web Applications (ReactJs/NextJs)
- API and Backend Development (NodeJs/FeathersJs/GraphQL)
- NoSQL Databases (MongoDB), Redis / ElasticSearch

January 2018 - September 2022

ThingTeam Studios, thingteam.com

Independant Contractor, Full Stack Team Lead

Worked as a Full Stack Developer creating Website Applications and Mobile App solutions. Additionally, I lead a small team of developers, acquiring and managing Projects from several countries. Technologies I worked with include:

- Hybrid Mobile Applications (Flutter), Web Applications (ReactJs/NextJs)
- API and Backend Development (NodeJs/ExpressJs/Laravel/GraphQL), Products and Portfolio Websites based on Wordpress and plugin development
- Support & DevOps (AWS/Gitlab CI-CD)

August 2016 - November 2017

Themerella Studios, themerella.com

Frontend Developer (Remote)

Worked remotely on the Flagship Project of the UK based company, as an Assistant Frontend Developer, for 1.5 years. Skills I worked with include PHP, Javascript, HTML5, SCSS & jQuery.

Independant Projects

Nurish.ai

Support & DevOps for 3 years, Frontend and Backend Development

Salytics.com

Frontend Development in NextJs, Typescript & Strapi Headless CMS

Gardenbar Mobile App

Hybrid Mobile App Development based on Flutter and Backend Development on NodeJs

CascadeMD

Frontend Dev in NextJS, Typescript, Tailwind, GraphQL & Directus Headless CMS

Achievements

HP Summer Training Noida Center

Grade A+, 2 Months Summer Training in Android Development, June-July 2015

IT Wizard Curriculum, NIIT

Outstanding Grade, 2008-09 (while in 9th standard)

ROBOTech Labs & Tech Fest, IIT Bombay

1st, International Robotics Challenge, 2014

Youth Vibe, LPU National Open Fest

Web Development (Participated), October 2013

POS Software for Major US Fast-Food Chain

Tech: React.js, Node.js, Microsoft AD, ITSM, GitHub Actions, Azure DevOps

- Led frontend and backend development of a centralized platform to manage application and package deployments to POS machines across the US.
- Implemented secure authentication and authorization using Microsoft Active Directory.
- Integrated ITSM workflows for approval/rejection of package push requests.
- Designed a clean Git branching model (Dev/Staging/Prod) replacing version-specific branches.
- Automated staging-to-production CI/CD deployments using GitHub Actions and PAT tokens.
- Standardized frontend architecture with React Context API, Redux, form validations, and component structure; resolved deep prop-drilling and improved large dataset rendering.

FinOps Integrated Web Application

Tech: React.js, Node.js, MySQL, AWS Cognito, Docker, GitHub Actions

- Migrated a PowerBI-based reporting tool to a dynamic full-stack web app supporting complex forms, real-time data, and role-based access control.
- Re-architected backend for modularity and high performance using efficient queries, caching, connection pooling, and clustering.
- Built an extensible authentication microservice compatible with Azure AD, AWS Cognito, and other SSO providers.
- Cleaned up legacy frontend codebase; introduced coding standards, React Query, validation libraries, and eliminated redundancy.
- Created Dockerized deployments and CI/CD pipelines for S3 and EC2 with GitHub Actions.

Contracts Lifecycle Management Platform

Tech: Next.js, Node.js, AWS Cognito, Yarn Workspaces

- Developed an internal tool to manage organizational contracts with full control over authentication, document access, and workflows.
- Led frontend development using Next.js with SSR, setting up coding standards and component structures.
- Integrated AWS Cognito for authentication and managed shared libraries using Node.js Workspaces.
- Served as a bridge between frontend and backend teams, standardizing form validation and document handling logic.

Consulting for Internal Tools

Internal Task Management System

- Optimized MongoDB queries involving deeply nested aggregations by restructuring data across collections.
- Recommended and implemented Git branching strategies and CI/CD workflows to separate dev and prod environments cleanly.

React.js UI Performance Consulting

- Helped teams adopt modern React patterns: removed prop drilling, introduced Context API and local/global state separation.
- Streamlined complex form validation with react-hook-form and reusable validation schemas.
- Improved UI performance using Virtualized Lists and IndexedDB for client-side caching of large datasets.

Observability Dashboard

- Resolved frontend rendering issues in complex graph-heavy dashboards built with React.js.

Full Stack Platform Development

Tech: React.js, Node.js, MySQL, Flutter, SEO, Animation

- Contributed to backend, frontend, and mobile app development for e-learning and community platforms.
- Led frontend performance and SEO optimization for landing pages; implemented interactive animations for better UX.
- Mentored a team of junior developers across full-stack development, introducing scalable code practices, reusable components, and clear documentation.
